TECHNICAL SPECIFICATIONS & PROCESS PARAMETERS:

- * High-tonnage progressive die press lines from 20T to 250T mechanical presses.
- * Coining and progressive stamping engineered for repeatable high-volume production.
- * Materials processed: CRCA Mild Steel (10 to 16 gauge), Stainless Steel (304/316), Aluminum, Brass/Copper.
- * Automated 7-stage chemical surface pre-treatment (degreasing, zinc phosphating passivation).
- * Electrostatic epoxy-polyester powder coating application maintaining minimum 80 DFT.
- * Gas/diesel convection curing ovens holding 200 deg C for 20-minute polymer cross-linking.
- * CMM Metrology inspection, optical comparators, and digital Elcometer DFT testing.

Quality Compliance: ISO 9001:2015 Standards | Raw Material Mill Certificates Supplied
