TECHNICAL SPECIFICATIONS & PROCESS PARAMETERS:

- * Material: Ultra-low carbon steel ($C < 0.08\%$) ensuring maximum magnetic permeability.
- * Thickness Range: 5.0 mm to 6.0 mm plate blanking.
- * Surface Flatness: Precision flat blanking ensuring optimal voice coil alignment.
- * Flux Path: Optimized pole piece dimensions preventing acoustic voice coil distortion.
- * Surface Protection: Bright zinc trivalent plating or uniform electro-deposition coating.
- * Applications: Automotive subwoofers, pro-audio line arrays, and home theater speakers.

Quality Compliance: ISO 9001:2015 Standards | Raw Material Mill Certificates Supplied
